FINDINGS:

- A. This facility is an existing (since 1971) 389 acre Class II-2 sanitary landfill utilizing the cut and fill method of operation. The disposal site is located approximately 2.8 miles southwest of Cotati on the westside of Meaham Road.

Remaining site life is estimated to be 10 years. This facility receives 725 tons per day of Group 2 & 3 wastes and is operated from 7:00 a.m. to 7:00 p.m., seven days a week. Salvage operations are conducted for newspaper, cardboard, glass, aluminium aluminum and iron.

Types of waste received at the site include:

1. Household and commercial waste.
2. Agriculture and demolition waste.

Design and operation of the facility are as specified by the Reports of Disposal Site Information dated May 1979 and February 1984. There may be significant changes in design or operation in the next five years. Projected closure of the Healdsburg Disposal Site during 1987 will increase the volume of refuse received by 180 tons per day.

- B. The following documents condition operation of this facility:

1. California Regional Water Quality Control Board, North Coast Region: Waste Discharge Requirements No. 74-11.
2. Report of Disposal Site Information, May 1984.

- C. This facility's design and operation are currently in compliance with State Minimum Standards for Solid Waste Handling and Disposal.
- D. This permit is consistent with the Sonoma County Solid Waste Management Plan.
- E. The Sonoma County Planning Department has made a finding that the surrounding land uses is compatible with the facility. Land within 1000 feet is zoned agricultural.
- F. Sonoma County has found that this facility is consistent with the latest version of its General plan.
- G. The local fire protection district has determined that the facility is in compliance with the Public Resources Code sections 4373 and 4374 (clearance required from the perimeter of exposed flammable solid waste).

II. CONDITIONS:

- A. Requirements:

1. This facility must comply with the State Minimum Standards for Solid Waste Handling and Disposal.

2. This facility must comply with all federal, state, and local requirements and enactments.
3. Additional information concerning the design and operation of this facility must be furnished upon request of the enforcement agency.
4. The registered civil engineers report reviewing the site design, implementation, and operation plan submitted as required by section 17751, Title 14 is made a part of this permit.

B. Prohibitions:

The following actions are prohibited at the facility:

1. Scavenging
2. Burning of garbage
3. Disposal of hazardous wastes or group 1 wastes
4. Disposal of sludges and wastes with less than 15% solids.

c. Specifications:

1. No significant change in design or operation from that described in Items A and B of the FINDINGS section is allowed, except for those changes which are required under the CONDITIONS portion of this permit. Any significant change which may be proposed for the facility shall require submission of a revised Report of Information and new application for a solid waste facility permit to the local enforcement agency and the Board for review.
2. This facility has a permitted daily capacity of 1470 tons per operating day and shall not receive more than 1760 tons per day unless it first obtains a modification to this permit. The remaining capacity of the landfill is 2,766,500 tons.

D. Provisions:

1. This permit is subject to review by the enforcement agency, and may be suspended, revoked, or modified at any time for sufficient cause.

E. Monitoring Program:

The following items shall be monitored by the operator of this facility or his agent. Records including but not limited to these items shall be kept and made available to the enforcement agency upon request:

1. Daily volume of wastes in cubic yards, and weight in tons.

2. Copies of correspondence with consultants or agencies regarding the design and/or operation of the disposal site.
3. At the discretion of the Local Enforcement Agency landfill gas probes shall be installed for detection of migration. If needed, a landfill gas control system shall be installed.
